

Exhibition Update from ProSoft Technology: in-chassis modules and stand-alone gateways

ProSoft Technology offers a unique range of in-chassis modules for PLC/PAC controls systems and stand-alone gateways to help PROFIBUS users to easily solve their connectivity issues.

ProSoft Technology's PROFIBUS DP V1 master in-chassis modules and stand-alone gateways support FDT/DTM for field device assets.

ProSoft Technology's new range of Wireless products that, with the PROFIBUS stand-alone gateways, can extend the PROFIBUS networks range or bring remote PROFIBUS devices to a central control system (DCS or PLC) or be used with PROFINET IO to provide a reliable, stable wireless connection.
