

Karsten Schneider

Karsten Schneider graduated in electrical engineering at the Friedrich-Alexander-University Erlangen-Nuremberg, Germany. More than 15 years ago, he started at Siemens AG in the central research and development since he was engaged in various activities.

Among other Schneider was appointed head of Development of MES Components and Marketing Manager for Distributed I/O. In this context, Schneider also accompanied the launch of the PROFINET technology in February 2003. More detailed knowledge about the fieldbus technology, he has amassed as head of North

America PICC Competence Center and Test Lab for PROFIBUS & PROFINET in Johnson City, TN. In May 2012 he was elected Chairman of PI (PROFIBUS & PROFINET Internationl).
