

Mark McCormick

Mark has worked at Siemens for 15 years and is a product specialist in network communication with years of experience with Profibus PA for process instrumentation. Mark has been involved with the Profibus UK group for several years and presented at most of the Profibus in Process seminars held around the UK.

Mark entered the Instrumentation field in 1985 in his Apprenticeship with British Nuclear Fuels at the Springfields fuel manufacturing site near Preston, then progressed to Sheffield University to study for his BEng Degree in Electronic, Control & Systems Engineering, later joining Siemens Instrumentation and then progressing into his current support role helping customers with PROFINET, Ethernet switch networks, WirelessHART and WirelessLAN.
