

SIEMENS

Come, see, marvel: Experience Machine Safety!

Safety Integrated: The fast and easy way to safe machines – at highest productivity

Safety Integrated

We would like to invite you to our Safety Integrated Tour

You will be provided with the latest information on our functional safety solutions onboard our truck.

From safety sensors, to the modular safety system and controls, down to drives with safety functions, also with fail-safe communication via AS-Interface, PROFIBUS or PROFINET – even wireless.

Convince yourself of how Safety Integrated facilitates the easy, flexible and efficient realization of your safety applications.

Hands-on technology

We will stop by in your region! Seize the opportunity to discuss your questions with our safety technology experts, who will be pleased to inform you on the suitable solution for your requirements. We are looking forward to your visit!
